

Move beyond scribes to automatically document care

Why AI makes more sense than medical scribes

44% of scribes have no prior experience

Only **22%** of scribes have a form of certification

The one-to-one scribe relationship doesn't scale

High turnover rates lead to continuous training to get accurate notes

No industry standard for medical scribes leads to inconsistent documentation quality

There's no quality assurance; physicians are responsible for QA

Scribes do not enter notes in the EHR, providers perform that task.

Meet the Nuance Dragon Ambient eXperience (DAX)

Clinical documentation that writes itself™

1 Improve the patient experience

83% say their physician is more personable and conversational

81% say their physician is more focused

75% say their physician spends less time on the computer

2 Boost physician satisfaction

70% reduction in feelings of burnout and fatigue

9 out of 10 physicians recommend DAX

93% would be disappointed if they no longer had DAX

79% of physicians state DAX improves documentation quality

3 Increase operational efficiency

7 minutes saved per encounter

50% reduction in documentation time

3-5 appointments added per clinic day, on average

“We’re seeing better stability for our doctors by utilizing DAX, as they are able to reduce the stress that comes from not knowing if the scribe support team will be available.”

Kristy Gleaton
DIRECTOR OF OPERATIONS,
THOMAS EYE GROUP

“The savings built into DAX, and the return on investment has truly been remarkable.”

Robert McDermott, M.D.
ALLERGIST AND IMMUNOLOGIST
