

# Capture the complete patient story naturally and efficiently.

Advanced speech-driven clinical documentation with secure, convenient, and comprehensive support across the continuum of care.

## Fast, flexible, and future-proof

Built on a modern architecture, Dragon Medical One, the industry's #1 rated conversational AI workflow assistant and documentation companion, empowers clinicians to create comprehensive clinical documentation and more naturally navigate workflows using just their voice.

- **Unrivalled accuracy.** Sophisticated speech capabilities allow you to dictate high-quality notes. Achieve unrivalled accuracy, including automatic accent detection and audio calibration, with no voice profile training.
- **Dictation done better.** Advanced speech with natural language commands promotes an efficient approach to documenting care before, during, and after the patient consultation. Clinicians decide how and where documentation gets done—from dictating at the cursor to using an integrated dictation box, as well as modern browser support.
- **Personalised productivity boosters.** Streamline documentation by creating voice commands and custom vocabularies across individuals, departments, and healthcare organisations.
- **Extra mobility.** When paired with PowerMic Mobile, any workstation becomes a dictation station, giving clinicians freedom to document notes using their smartphone as a secure wireless microphone.
- **Consistent voice experience.** Easily manage licenses, deployments, and default settings to ensure an efficient, familiar, and predictable experience across care settings, devices, and apps.
- **Industry-leading architecture.** With remarkable responsiveness and resilience, this GDPR - compliant and ISO 27001 - certified solution enables broad integration and seamless support for both browser and web-based EHRs—giving you the flexibility you need in the environment you want.

**Ranked #1 Best in KLAS: Software & Services award for 4 consecutive years, 2021-2024, Dragon Medical One is secure, trusted, and proven.**

## Delivering better productivity, efficiency, and quality

**98%** of clinicians recommend Dragon Medical One

**50%** less time spent on documentation

**100** million fewer clicks per day

**54%** increase in optimised user productivity

**8 out of 10** clinicians agree that Dragon Medical One improves overall documentation quality

Dragon Medical One is hosted within the Nordic cloud supporting the high availability, business continuity, and security demands of Norway.

## Ease access for an improved workflow experience

Using voice capabilities, Dragon Medical One alleviates the administrative burden on clinicians. By reducing repetitive tasks and easing information access, clinicians can spend less time on documentation—and more time with patients.

### Custom capabilities

Create your own voice experience by automating tasks such as EHR navigation, orders, and signing notes. Go beyond clinical workflows to draft personal emails, navigate Microsoft Office documents, and search the web.

## Boost efficiency and improve performance

Use analytics to track and monitor usage trends while maximising individual and group-level performance on regular basis. Identify opportunities for ongoing improvement and measure performance against hundreds of thousands of users across all healthcare organisations.

## When people aren't talking to Dragon Medical One, they're talking about it

"Dragon Medical One has had a big impact on the efficiency of getting my letters done. I am now able to send my letters within 24 hours—or even instantaneously if there are no blood results to be waited upon. This compares with the pre-speech recognition era where letters took 2 weeks or even longer to be completed."

— Dr Paul Altmann, Chief Clinical Information Officer, Oxford University Hospitals NHS FT

"I used to dictate and it would take a week or two for the dictation to be printed. Today, when I use speech recognition, the text comes immediately. For my colleagues it is also an advantage that the text is ready, because then they don't have to listen to a dictation if a patient calls the telephone helpline or the emergency room."

— Mari Gustafsson, Specialist nurse in psychiatry in the Region of Kronoberg

### About Nuance Communications, Inc.

[Nuance Communications](https://www.nuance.com) is a technology pioneer with market leadership in conversational AI and ambient intelligence. A full-service partner trusted by 77 percent of U.S. hospitals and more than 75 percent of the Fortune 100 companies worldwide, Nuance creates intuitive solutions that amplify people's ability to help others. Nuance is a Microsoft company.
